To get a hand pallet truck moving is the heaviest part of the transport. With BT Pro Lifter the truck will take the first steps by itself. A hand pallet truck loaded with 2300 kg needs a starting force of 45 kg to get into motion. With BT Pro Lifter that amount is reduced to 15 kg.

- A connection between the tow bar and the steering wheels transfer the force from the pump stroke to the wheel to get the truck started.
- Through a control on the handle you can choose the direction of the starting force.
- Unique option for heavy duty applications and easy positioning.
- Smooth driving over uneven surfaces and thresholds.
- High ergonomomy. Reduces strain to arms, shoulders and back.
- Increases the productivity.
- Steering wheel in powerthane is standard.
- The Quick Lift is the best ergonomic choice, because the number of pump strokes are reduced.
- Also available in U-model with minimum height 75 mm.
- BTs unique lifetime guarantee, gives the customer 99-years functional guarantee on the fork frame. The guarantee on the pump unit and the tow bar is five years.
- This product has been environmentally declared. Separate information sheet is available.
